SIU Regional Meeting: Residents

About the program

The SIU Regional Meeting for Residents presents a unique opportunity for global exchange, broadening international perspectives in training and education, and learning best practices in patient care and research from experts, all while building networks for future collaborations.

Learning Objectives

At the end of this programme, participants should be able to:

- Understand the latest advances in the diagnosis, staging and treatments of urologic cancers.
- Examine the latest advances in BPH surgery including uMIST, endoscopy and laser technologies
- Understand the challenges and facilitate inclusion and opportunities for underrepresented groups in urology.
